

Dulles Community Outreach Project Android Users Guide*

Smart Phone App:

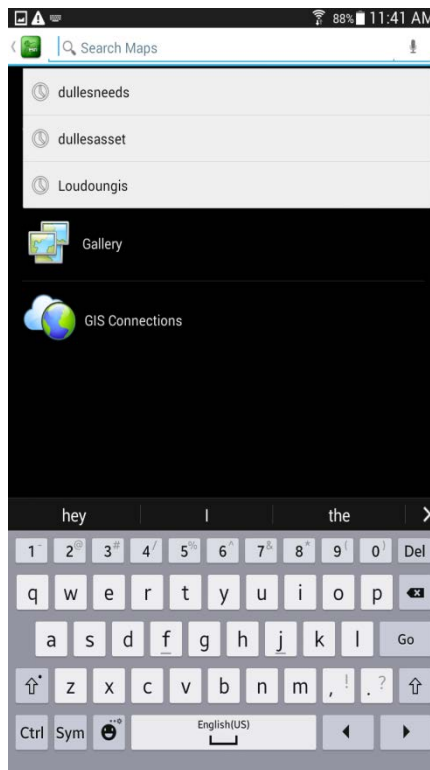

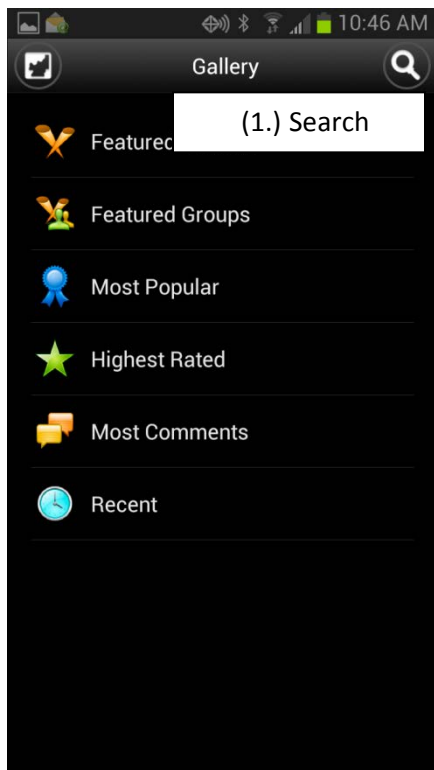

*Instructions may vary slightly with different Android devices

Download and install the **ArcGIS** app from the Google Play Store

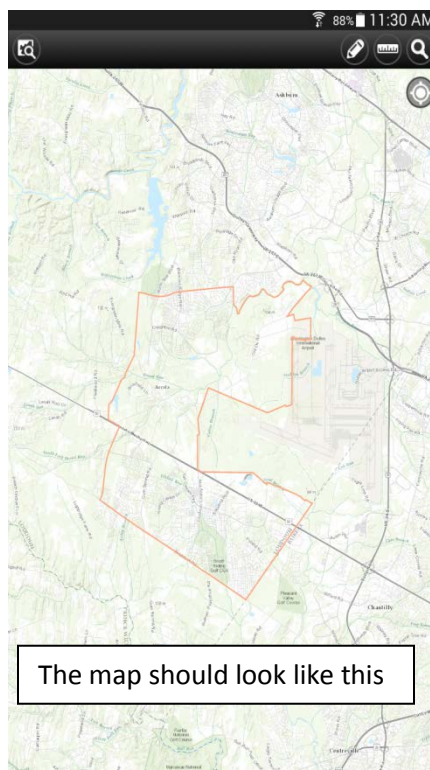

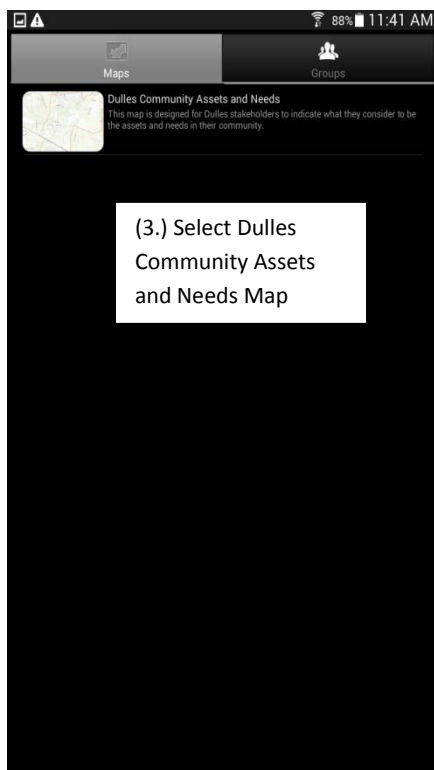

1. Open ArcGIS app and click the **search icon**
2. Search for 'dullesneeds'
3. Select **Dulles Community Assets and Needs** map
4. Select "Open" to go to the map application
5. Click GPS button to start GPS in app (enable GPS if asked)
6. Click the pencil icon to begin collection
7. Select 'Assets' or "Needs"
8. Fill out information in remaining textboxes
9. To add a photo select "Add Attachment" and hold the device such that the volume button is pointed down.
10. Select from Camera or Gallery and add item
11. Select map&pencil icon to return to map for capture.
12. At bottom of screen select first icon to collect point using GPSClick green checkmark (top right) on map when finished
13. Click green checkmark (top right) on data entry screen when finished
14. "Edit applied successfully" will display on map screen
15. (Some devices may have the option to delete existing points)
